

THE FIRST...THE FINEST

Second Wind 1000 Series Product Guide

Ultraviolet Germicidal Purification for HVAC Systems Powerful Purification in Places Other Systems Can't Reach

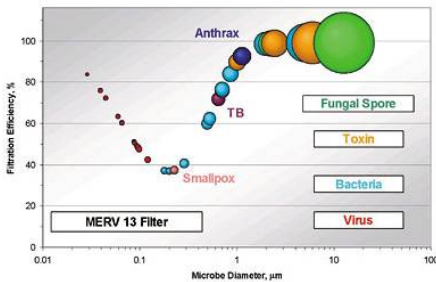

**Multi-Year Ballast Warranty
& 1 Year Lamp Warranty**

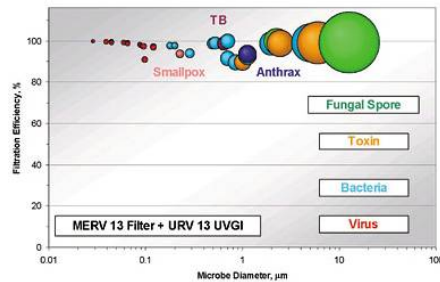

**Longer Contaminant Exposure
Times than Probe Style Purifiers**

Installs Parallel to AirFlow

HVAC System with particulate filter only

HVAC System with Second Wind 1000 Series installed

**Ergonomic Design
Hinged Base for One-Handed Servicing**

BENEFITS OF OWNING A 1000 SERIES AIR PURIFIER

FDA Class II Medical Device: K980745

- Improved HVAC Air System Efficiency
- Low cost operation
- Limited Lifetime Unit Warranty
- Over 9000 hours lamp expectancy

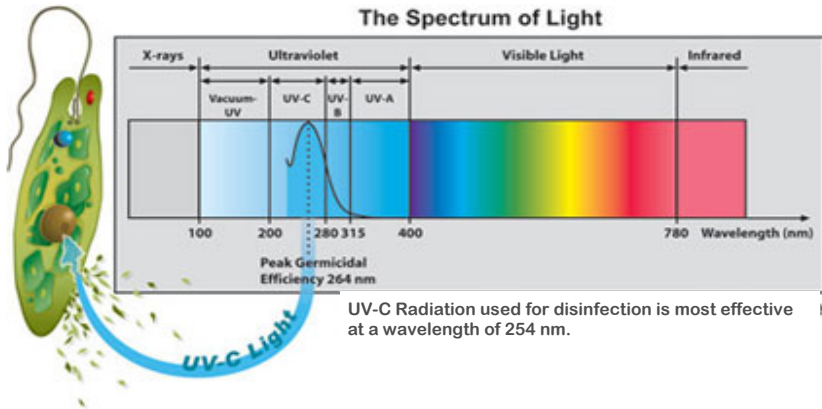

- Improved Indoor Air Quality
- Reduces Infectious Disease
- Disinfects Mold
- Reduces Airborne Allergens, Bacteria & Germs From Indoor Air
- Singlet Oxygen Production reduces Volatile Organic Compound (VOC) levels throughout the household

- Safe and Effective
- Proven Effectiveness through Independent Testing
- Chemical-Free Disinfection
- EPA Registration# 73112

The North American population is spending more than 80% of its life indoors. Indoor air is generally two to five times more contaminated with invisible organic chemical and biological agents than the outdoors. Some may create bad odors, others can be extremely harmful to your health.

Ultraviolet light has four wavelengths: UV-A, UV-B, UV-C and V-UV. Second Wind 1000 Systems use two lamps—**twice the power** of our competitors. The custom designed lamps produce germicidal light at optimal UV-C wavelength of 253.7nm. The second lamp irradiates UV-C lightwaves and V-UV lightwaves to create singlet oxygen molecules. These **Superoxide Ions neutralize VOC's** in your air duct stream and battle the off-gases and odors throughout your home or office -- even away from the light source. The complete 1000 Series system package provides the best purification in a small compact package.

The Second Wind 1000 Series						
Model	Unit Size (L x W x D)	Weight	Lamp Length	Power Supply	UV Intensity (each) at 12"	Warranty
1000KCS	14" x 6" x 3-1/4"	6 lbs	9"	120VAC	312 μW/cm2	Lamp: 1 year Ballast: 5 year
1002KCS	23" x 6" x 3-1/4"	10 lbs	18"	240VAC	864 μW/cm2	Lamp: 1 year Ballast: 3 year

1000 Series Lamps operate at 425mA, and are rated for 9000 hours of continuous operation before replacement is required.

1000 Series custom Ballasts are: Electronic; Class P; Sound Rated 'A'; Type HL ; no PCB's; Type 1 Outdoor; meets EMI requirements of CFR Title 47 Part 18
